

Job Description

Controls Engineer

Ageto has an opening for the right person to join our team of microgrid experts in Fort Collins, Colorado. This is an amazing opportunity to play a vital role in fulfilling our mission of accelerating the adoption of renewable energy. You will work as part of a growing team focused on delivering world-class microgrid control solutions, collaborating with colleagues and customers, developing software, deploying solutions, and providing exceptional customer support. This position requires travel throughout North America and the world.

Responsibilities:

- Perform installation and commissioning of microgrid control systems
- Develop control interface to energy resources (including power meters, protective relays, generator controllers, PV inverters, energy storage inverters, battery management systems, wind turbines, weather stations, etc.)
- Develop, test, and deploy control algorithms
- Conduct system functionality testing, commissioning, troubleshooting, and reporting
- Perform onsite investigation and troubleshooting, create reports and fault analysis
- Create studies, reports, specifications, requirements, cost estimates, electrical drawings, one-line diagrams, and equipment layouts
- Advise colleagues on technical specifications, requirements, and considerations for project proposals
- Perform technical support for customers and colleagues
- Oversight and direction of third-party contractors

Skills and Qualifications:

- Power generation experience (reciprocating engine and inverter based synchronizing, paralleling, and load-sharing, energy storage systems)
- Communications protocols (Modbus, DNP3, CAN 2.0A/B, J1939 CANbus)
- Programming languages (IEC 61131, Python, REST API)
- Programming experience (SCADA and PLC)
- Knowledge and understanding of electrical design codes (UL 508A, NEC, NEMA)
- Ability and desire to travel internationally, including remote locations in third-world countries

Personality Traits:

- Ability to convey complex ideas and issues in a clear, concise, and understandable manner
- Outstanding analytical, organizational, and troubleshooting skills
- Attention to detail, passion for excellence, and commitment to customer success
- Self-motivated and self-directed
- Enthusiasm and eagerness to learn, teach, and improve
- Passion for renewable energy and electrification

Requirements:

- Valid driver's license and passport
- Ability to travel internationally
- Ability to lift 50 lbs. safely
- Ability to use common hand tools safely
- Ability and knowledge to work safely around electrical equipment and controls at all voltage levels
- Ability to sit, stand, walk, reach, kneel for extended periods of time, including at trade shows and customer sites
- Ability to communicate verbally to small or large audiences
- Ability to access a variety of customer facilities, including but not limited to stairs and ladders
